# Full Instructions

---

1. Start by writing a list of all the **major goals** you want to achieve in your life.

2. Assign at least 2 **long-term** goals (to complete within the next 1-2 years) to each of the domains provided.

*Note: goals should be both meaningful and reasonable to achieve e.g. “get a promotion at work”.*

3. Once you have written down your goals for each domain, rate your current progress towards them on a **scale of 1-10**.

1 = no movement made towards your goal

10 = very satisfied with your progress towards the goal

4. Repeat this process on a **weekly or monthly** basis as a way of tracking your progress and identifying which of your goals are close to completion and which require more attention.
